

## **Tested scenarios**

### **#1 - Search for a product using the search box**

Scenario: The user searches for a product

Given the ecommerce webpage has a search box

When the user writes the name of a product that matches with one in the product list

Then the web shows the product to the user

### **#2 - Add product to cart**

Scenario: The user adds a product to his cart

Given the user needs to save a product for buying it later

When the user clicks on "Add to my cart" CTA

Then the product is saved in the user's cart

### **#3 - Delete product from cart**

Scenario: The user deletes a product from his cart

Given the user may not be interested in a product anymore

When the user access his cart and clicks on the "X" CTA next to a product

Then the product will be removed from the user's cart

### **#4 - Compare two products**

Scenario: The user compares pros and cons between two products

Given the user wants to compare two products

When the user clicks on "Compare" CTA on two products

Then the products will be available for comparison in a new page

### **#5 - Contact customer service**

Scenario: The user contacts CS for information

Given the user may need help to finish a buy or more information

When the user fills the "Contact us" form with their worries

Then the form will be sent to the CS team
